

Overview

Lumina Spark provides highly interactive and fun experiences in which learners explore who they are, using an individualised psychometric profile tool called a Lumina Portrait. It provides a colourful framework for better self understanding and helps people identify how to improve their working relationships with others. By applying the Lumina Spark model, learners can unlock many business benefits.

The foundational Spark resources can be designed into different types of learner experiences such as short presentations, a broad range of training courses, inspirational coaching sessions or an in-depth group facilitation process.

Specifically, Lumina Spark will help your people become more influential with internal and external customers, it will give them a practical tool to produce results through the people around them.

A Client Perspective

Your Lumina Affiliate will be your guide to the Lumina Spark suite of models, psychometrics, e-learning and other resources. These can create powerful breakthrough learning experiences.

This is exactly what a multi-national travel client did when they needed to improve employee engagement and inject the passion back into customer service. A two day Lumina Spark programme was run cross-departmentally and the Commercial Director said:

'This is the most practical and inspirational method for raising our staff's self awareness and improving communication that I have ever experienced.'

Another client in the banking industry commented that:

'Having experienced a Lumina Spark workshop I have become more and more effective in my ability to run projects and handle the people side of things. My teams are experiencing less conflict and I feel great gratitude to the facilitators that helped me learn and grow in such a powerful way.'

How it Works

Your Lumina Mandala

The highly memorable four colour energies, underpinned by a further eight aspects are symbolically displayed in the Lumina Portrait on a mandala.

Lao Tzu stated 'He who knows others is wise. He who knows himself is enlightened' and it is upon this premise that Lumina Spark interventions are based. We know that everybody is unique and adopts their own individual style in communicating with others. No two people have the same wants, desires or expectations. For this reason attaining a greater level of self awareness is an integral part of Lumina Spark.

Lumina Portrait Short Questionnaire

The questionnaire is available online, it takes between 10 and 15 minutes to complete and enables learners to receive their highly personalised Lumina Portrait which accurately describes their persona. It helps them explore their own unique qualities and provides them with a practical method for 'reading' other people. When we know ourselves and we have the skills to appreciate others, we can then begin to refine our behaviours to meet the needs of the situation and significantly improve our relationships and teamwork.

Lumina Spark's simple and memorable colour language gives everybody a common foundation for talking about behaviour. This approach raises selfawareness. Using this new knowledge, individuals can develop their interpersonal skills which contribute to a positive 'can do' team spirit. When this builds a critical mass, breakthroughs begin to happen in team dynamics and leadership style.

We pride ourselves on the fact that every Lumina Portrait is unique to the individual. It describes how an individual's preferences for using the four colour energies impacts their behaviour and performance at work. In addition to highlighting the strengths to build on, it also shines the light of awareness on potential blind spots. All Lumina Spark interventions end with a powerful action planning process to ensure positive commitments are tracked using 'My Lumina Online'. We believe that ongoing support is crucial in sustaining continuous change.

For clients who have invested in other Jungian approaches, Lumina Spark is available through a Jungian lens. When Lumina Spark is integrated into existing programmes in this way, clients report that the practical application of the core Jungian messages is significantly enhanced.
